

# **Royal York Station Easier Access Project**

## ***Night work***

**Date: Weekend - March 10, 2018 and March 11, 2018**

**Time: Between 12:00 a.m. and 7:00 a.m.**

\*Timelines are subject to change, content is accurate at time of printing

Construction to make Royal York Station fully accessible is well underway. As part of this project, crews will be working overnight this weekend during the above-noted times.

### **Work Description**

The contractor will be delivering material and equipment to the site which will be lowered to track level through an existing vent shaft. The material is required for construction of one of the elevator shafts. The work will be contained within the construction site however for safety reasons, the delivery must take place while subways are not operating.

The vent shaft (access point) is located at the south end of the site, adjacent to the laneway.

### **Community Impact**

This work will involve the use of a small crane and other motorized equipment. During this work, noise from the crane, beeping sounds from construction vehicles and other construction related activities may be audible to area residents.

Efforts will be made to have the work completed as quickly as possible.

### **TTC Service**

There will be no impact to station operations.
