

Old Mill Station

Bus roadway and platform improvements

Update – temporary bus diversion

Dates: August 5 to August 31, 2018

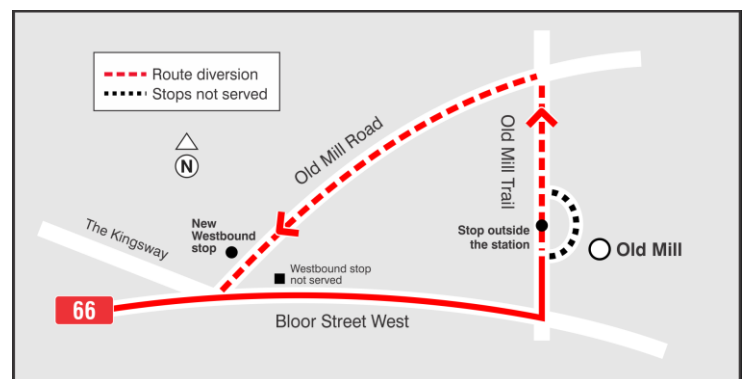

*Content/timeline accurate at time of printing

Work description and purpose

Work to rehabilitate the bus roadway and passenger platform at Old Mill Station is being phased to maintain bus service through the loop as long as possible.

Update - next phase

Starting Sunday, August 5 the next phase of construction requires the full closure of the bus loop. Buses on the **66 Prince Edward route** will temporarily divert on local streets near the station. The bus loop/platform is scheduled to reopen on August 31 or sooner if conditions are suitable for safe vehicle operations.

TTC service

66 Prince Edward route

- Buses will be restricted from entering the station bus loop and will be diverted on streets closest to the original route to maintain the best possible transit service. Diversion routing; east on Bloor Street, north on Old Mill Trail, west on Old Mill Road and west on Bloor Street to regular routing.
- A temporary northbound bus stop will be established on Old Mill Trail near the station, and a temporary westbound stop will be located on Old Mill Road near The Kingsway. The existing westbound stop on Bloor Street at Old Mill Road will not be served during the diversion.
- The station is open, and subway and bus service is maintained during the project.

Traffic

Two-way through traffic on Old Mill Trail will be maintained. Intermittent delays should be expected.

All work related to this project is scheduled for completion by December 2018.

Thank you for your patience during this temporary bus diversion as we work to improve transit infrastructure.
